1. Introduction

Rough Brothers offers industry leading design, manufacturing and construction services. Combining all three services and contracting with Rough Brothers on a Design/Build basis will insure that your greenhouse or conservatory project is a successfully completed one.

Utilizing Rough Brothers' Design/Build services marries a well thought-out design with quality manufacturing and superior greenhouse systems & equipment. These elements combined with an experienced and professional construction team will yield a fully operational and fully functional growing facility. [MORE >>](#)

3. Why Rough Brothers

Having Rough Brothers join your team in the early concept planning stages will insure a great Design/Build project . Rough Brothers has the the decades of experience and talented personnel that can make your greenhouse or conservatory project a successful one. No sense in back-tracking or ending up with a non-functional design. Make sure your greenhouse or conservatory gets pointed in the right direction from the very beginning.

With Rough Brothers' Design/Build services you will get informed recommendations with respect to orientation, footprint, structure types and styles, glazing material options, heating and cooling considerations and much much more... Rough Brothers will provide detailed AutoCAD drawings for the greenhouse or conservatory completed by Rough Brothers' company personnel. Likewise, your greenhouse or conservatory drawings will be structurally engineered and stamped by Rough Brothers. As part of Rough Brothers' Design/Build services we are happy to provide renderings, cost estimating and construction scheduling.

Rough Brothers is anxious to be an integral part of your greenhouse or conservatory project. As your Design/Build team member, Rough Brothers will take responsibility for the greenhouse or conservatory and make sure that the design & construction meet all the project requirements.
